Jed Emelle

Backend Developer | Building Backend Systems and APIs with Node.js, Express.js & MongoDB

Owerri, Imo State, Nigeria

Summary

Hey, I'm Jed, a Backend Developer focused on evolving into a Backend Engineer - with a long term goal of working in backend game development. Working with Node.js and Express to build APIs, authentication systems, and backend architectures. Interested in scalable systems and clean system design.

Experience

CodeAlpha

Back End Developer

June 2026 - Present (1 month)

- Working as a Backend Development Intern at CodeAlpha.
- Building and maintaining RESTful APIs using Node.js and Express.js.
- Designing and managing databases with MongoDB and Mongoose.
- Implementing authentication, authorization, and backend security practices.
- Developing real-world projects to strengthen software engineering and problem-solving skills.
- Using Git and GitHub for version control and project management.

Education

Federal University of Technology Owerri Nigeria

Bachelor of Engineering, Computer Software Engineering · (2024 - 2029)
